

Excerpt from April 24 Stakeholder meeting notes

***Requested information: Inventory of our unique cultural/historical assets (culture and history category)***

Harvey presents a list he compiled to fulfill this information request. He tells the Stakeholders it's a work in progress; that it's already been modified in committee, and it's the kind of list that can always be added to or altered. He called people all over and put together a 3-page list of local assets and resources that are currently or could be expressed through tours, programs, venues, and other approaches. He invites the Stakeholders to participate in the ongoing revision of this list, and it is suggested that the list could live on a website, allowing it to be dynamic and constantly updated.

Matthew asks the Stakeholders if they have any other questions for Harvey, or if they need for him to provide any further information on this topic. The SH agree that Harvey has answered this request for information, and the topic is closed and given a red dot on the wall. SH are invited to give Harvey their ideas for additions to the list.
